My name is Haley Meredith, I have worked in healthcare for 20+ years. I began as a surgical tech at Hillcrest Hospital main campus in Tulsa, OK. I worked there for 8 years in their Labor and Delivery unit. I then went to LPN school and once completed was hired on at Southcrest Hospital, now known as Hillcrest South. I worked in their Postpartum Dept for 8 years then transitioned to Labor and Delivery once I obtained my RN in 2017. I have taken care of mothers, babies, GYN, Med Surg, and even some Pediatric patients when they came to our hospital. We were the only floor that had our PALS certification. Over my time at Hillcrest I have had some very sick, critical patients I have cared for. In May of 2019, I branched out and went to work at an LTAC facility in Muskogee, OK where I am still currently employed on a PRN basis. I try to work at least one to two days a week there. I have taken care of some very sick patients at this facility and have broaden my skill set tremendously. I have cared for intubated patients, trach patients, patients on IV drips that are only administered in a High OBS unit or ICU setting. I have learned so much and would like to continue to branch out and learn all I can. In January of this year 2021 I took an internal travel position at ST. Francis Hospital in Muskogee on their PCU (progressive care unit) and worked a few shifts in their ICU unit as well. I miss my moms and babies and am so looking forward to returning to the Labor and Delivery world as well.

Authorized to work in the US for any employer

Willing to relocate: Anywhere
