PROFESSIONAL PROFILE

- Registered nurse with strong experience in providing quality and efficient care to patients
- Professional with six years of practice in labor and delivery, pre-op, operating room, pacu, triage and antepartum
- Strong knowledge of standards of care in the hospital setting
- Reliable with a reputation for building a professional rapport with physicians and patients
- Committed to the care and safety of patients

EXPERIENCE

Labor and Delivery/Maternal Transport RN
Baptist Health System/North Central Baptist Hospital; San Antonio, Texas; February 2016-Current

Provides exceptional patient care while working in a fast paced level IV labor and delivery unit. Specialized in providing antepartum, intrapartum and postpartum care, including pre-op, circulating cases in the OR, and PACU. Selected as a maternal transport nurse and has the skills to triage and safely transport patients via ground/air. Possess the ability to immediately develop trust and relationships with patients and their families, comforting them during unknown events. Known as a team player and respected by physicians and fellow coworkers.

- Monitor and interpret fetal heart rate using monitoring equipment through labor and perform necessary interventions when appropriate
- Assist physicians with vaginal/cesarean deliveries and anesthesiologists with epidural/spinal placement
- Administered medication for labor inductions per hospital protocol and titrated per orders
- Managed high risk obstetrical conditions such as pre eclampsia, gestational diabetes, and multiple gestation
- Assess newborn at delivery and provide resuscitation when required
- Initiated care plans based on evidence-based practice
- Precepted new staff and nursing students

Postpartum RN
Baptist Health System/North Central Baptist Hospital; San Antonio, Texas; May 2015-February 2016

- Strong knowledge of postpartum care
- Provided assessments on postpartum patients as needed and provided care as appropriate
- Monitored patients for signs and symptoms of postpartum hemorrhage
- Developed care plans based on the patient's individual needs and teachings
