Work Experience

RN ED

UPMC Pinnacle - Hanover, PA

February 2015 to Present

Properly identifies and triage ED patients by chief complaint for all age groups and initiates protocols in collaboration with ED physician while demonstrating compassion, respect, integrity, and safe patient care. Manages the care, treatments, medications, and procedures of 5 patients that may include minor procedures, intubation, cardiac arrests, and moderate sedation.

RN ED

WELLSPAN YORK HOSPITAL

June 2017 to January 2022

Provide professional nursing care while safely and independently administering prescribed treatments, medications, and nursing interventions based on assessment, protocols, and plan of care. This care is in collaboration with other disciplines that include attendings and residents in the ED, respiratory, and additional specialty providers consulted.

CLINICAL INSTRUCTOR

HACC Gettysburg - Gettysburg, PA

August 2017 to May 2019

Clinical adjunct whose main job function is to oversee student's in clinical setting that includes MedSurg, ED, and ICU. My responsibilities include supervising 4-8 students with medication administration, nursing interventions and skills, and lastly grading clinical paperwork.

RN ICU

UPMC Pinnacle - Hanover, PA

September 2016 to July 2018

Provide care and treatment of the ICU patient while demonstrating excellent customer service to the patient and family, while keeping them informed regarding status of care. This unit requires close monitoring of the critically ill patient whether admitted from the ED, operating room, or transfer from another floor due to decline in status and requiring management of medications varying from vasopressors, various titratable drips, and for sedation. Lastly, collaboration with the cath lab in managing patient's status post PCI, EKOS, pacemakers both temporary and permanent.

RN PCCU

JOHNS HOPKINS HOSPITAL

May 2016 to September 2016

Progressive cardiac care unit consisting of 20 bed telemetry unit and 12 bed intermediate cardiac care unit. Responsibilities included monitoring cardiac patients for general cardiology services, cardiomyopathy services, electrophysiology and arrhythmia services and those for heart transplant or LVAD work up. This required care and management of patients from the cath lab, EP lab, LVAD's, and heart transplant wait list recipients with Swan Ganz catheter.

Awards

MISC.

Honors Society, Vice President of National Student Nurses Association, Tutor and Mentor

Military Experience

Trained as hospital corpsman in the Navy where I worked on Labor and Delivery floor and eventually in military sick. My role as a hospital corpsman is comparable to LPN. While enlisted, I was nominated for Sailor of the Quarter on two different occasions

Misc.

Passionate RN who strives to give back to student nurses and RN's new to the ED by mentoring in clinical setting that is conducive for learning. I feel my easygoing personality makes it easy for others to feel safe to communicate both needs and fears without feeling judged
