Seeking a position in the healthcare field as a Nurse where I can utilize my past experience and knowledge in patient care.

Authorized to work in the US for any employer

Work Experience

Registered Nurse, Labor and Delivery

Carle Health - Urbana, IL

February 2022 to Present

- Performs all responsibilities and duties required by unit as specific to the scope of service. Implements procedures and theories related to the specific area of practice. Maintains up-to-date and accurate documentation of nursing care provided to assure the integration of information for use by the healthcare team.
- Completes initial assessment upon patient admission and develops appropriate plan of care in accordance with unit standards and that is based on patient and family needs. Implements plan of care, nursing interventions, and patient care procedures. Modifies plan of care based upon continuous evaluation.
- Takes responsibility for patient and employee safety by reporting and/or correcting safety hazards and incidents.
- Communicates with others directly and in private when necessary to resolve issues. Offers constructive feedback to assist in the professional development of peers, and confers with colleagues to expand knowledge base. Identifies own learning needs and takes initiative to begin appropriate solution.
- Fulfills all requirements of departmental competencies.
- Provides care to the inpatient obstetric patient
- Monitors fetal well being
- Administers medication specific to the obstetric patient
- Provides patient education specific to the obstetric population
- Participates in the intrapartum care of the patient and newborn in labor, delivery and surgical delivery

LPN (Licensed Practical Nurse)

Carle Foundation Hospital - Urbana, IL

August 2020 to February 2022

When unit is full, LPN will work with RNs with highest acuity or will be paired with an RN who has a heavy patient load. When the UNL has patients, the LPN will be paired with the UNL to assist with the UNL patient load. LPN tasks may include oral meds, IV piggyback meds, trach care, dressing changes, documentation on assessments and care plans after the RN has completed the first assessment and initiated the care plan.

- Passes all medications, hangs IV piggybacks and fluids, excluding IV Push meds
- Charts assessments on assigned patients, given that an RN has charted the initial assessment.

- Charts on care plans, which the RN has opened. As needed will have RN open new care plans
- Communicates with physicians/Apps to receive orders and coordinate care for patient.
- Complete dressing changes as needed
- Complete trach care as needed
- Insert and care for NG tube and feedings through NG tube
- Care for and change ostomy
- Reinforce education and discharge instructions

Certified Float Phlebotomist

Carle Foundation Hospital - Urbana, IL

January 2018 to August 2020

* Serve inpatient and outpatient areas of the hospital. Work closely with a variety of healthcare professionals to collect blood specimens for diagnostic testing.

* Maintain appropriate response times to stat and time orders. Ensure quality by verifying patient identification and specimen labeling. Demonstrates compassion and caring in dealing with others.
