RN seeking a position as a full or part-time member of a team of medical professionals. While my previous experience is in cardio-thoracic surgery, I am seeking a position in a clinic where my intrapersonal skills will be better utilized. I am seeking a position that will give me more opportunities for actual facetime with patients versus my previous, strictly surgical, experience. While I am a licensed registered nurse, I am open to any opportunities that may not include nursing specifically. I have coordinator/supervisor experience in my background as well and could fill a role with these responsibilities.

Work Experience
