## Additional Information

---

**SKILLS & ABILITIES:** I have worked in the health care field for 20 years. My first priority is the care and safety of my clients. I am very organized, efficient, motivated and punctual. When at work I use my time wisely to get necessary tasks completed. Keeping my clients looking and feeling their best is a major goal. I consistently follow policies, procedures and protocols as outlined by organizational standards.

Passing medication accurately is a high priority. I make sure they are taken as prescribed. I have worked AM, PM and night shifts striving to maintain personal interaction with each of my clients. For 5 years I worked as a bath aid where I was able to develop my skills at creating a pleasant and comfortable atmosphere for my clients. My goal was to make this a safe and enjoyable experience.

**COMMUNICATION SKILLS:** When patients are angry or agitated I am usually very successful at calming and redirecting their attention. If clients are displaying unusual behaviors, talking incoherently, or emergencies arise I respond quickly and appropriately following organizational policies and procedures. At shift changes I consistently document and forward pertinent information to the charge nurse and shift replacement.
