Phase 1A In Illinois

The 1a priority population includes frontline healthcare workers as well as residents and staff of long-term care facilities and other congregate care settings. The goal is to fortify the healthcare workforce by removing the most exposed workers from the cycle of illness and infection as well as protect our most vulnerable residents. Most recent evaluations of Illinois' healthcare workforce, along with nursing home and long-term care facility residents and staff, estimate that approximately 850,000 Illinoisans qualify for Phase 1A. Healthcare vaccinations began on December 15, 2020, with the federal government's nursing home and long-term care vaccination program delivering its first shots on December 28, 2020. The state estimates that all interested residents in Phase 1A will be vaccinated in the coming weeks.

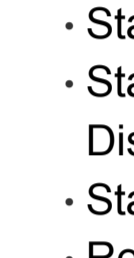

Hospitals Setting
