Time management – SBAR communication – EKG monitoring, chronic disease management – tube feedings – tracheal care – catheter insertions – wound care – colostomy care – glucose monitoring - team delegation – peripheral IV insertion – central lines care – mid-lines care - porta-cath care – patient teaching

WORK EXPERIENCE

HOSPICE CARE COORDINATOR NURSE

Calstro Hospice | Montclair, CA. | 01/2022-Present

- Formulate treatment plans for qualified Medi-Cal beneficiaries and individualize service plan.
- Use clinical expertise, nursing judgment and established medical criteria to formulate opinions as to relatedness of medical conditions by reviewing and analysing medical records.
- Develop and revise exiting individual service plans and treatment plans and evaluate effectiveness of plans in place.
- Create personalized care plan for each patient involved in care management to resolve barriers to care, close quality gaps in care, build additional education or contingency planning and engage with social support systems as appropriate
- Concise and meticulous documentation ready for submission to Department of Health Care Services (DHCS).
- Interview clients and loved ones to gather information for assessments and complete them accurately.
- Educate beneficiaries, community partners and families the scope of services offered under ALWP and the role of CCA.

HOME HEALTH FIELD NURSE

Heralds Home Health | Cerritos, CA | 11/2021 – Present

Admissions and direct patient care field nurse upon hospital discharge.

- Built a strong nursing foundation, increasing knowledge of core nursing competencies and nursing procedures
- Liaison between patient, primary care provider, and other disciplines, coordinating continuity of care
- Educates patient and caregiver to meet care plan goals, preventing patient rehospitalization
- Delegates to the LVN and HHA according to their scope of practice and strengths, improving workflow
- Consults with mentors, accelerating development and confidence in nursing practice and leadership
- Uses evidenced based practices when creating CMS approved plans of care, improving patient outcomes
- Constructively corrects practices that are not within the standard of care, preventing sentinel and adverse events
- Provides IV therapy and maintenance of port-a-caths, central/mid lines, and insertion of peripheral lines
- Concise and meticulous documentation, reducing hospital liability, increasing reimbursement rates, and being audit ready
