## Work Experience

---

### **Post Transplant Coordinator**

Augusta University Medical Center - Augusta, GA  
July 2014 to March 2022

I take care of patients after kidney/pancreas transplants. I also educate the patients about what they will need to be doing after being discharged from the hospital. I am basically at a desk, refilling prescriptions, answering triage questions, going over lab results and calling patients with new orders from physicians.

### **Staff Nurse/Charge Nurse, Clinical Manager, Home Therapies Manager**

Fresenius Medical Care - Thomson, GA  
October 1997 to July 2014

I worked for Fresenius for 17 years. I started as a Staff RN, moved up to Charge RN. I started patients on dialysis treatments, monitored them and gave meds during treatments. I took orders off after MDS rounded. I then was promoted to Clinical Manager and handled quality issues, worked with the budget, dealt with staffing issues and dealt directly with the MDS. I then was promoted to Home Therapies Manager and taught patients how to perform home hemodialysis and peritoneal dialysis at home as well as being the manager. I handled quality issues and dealing with MDS.

## Education

---

## Additional Information

---

I was pulled to work on Covid unit August 2020 and August 2021. I took care of Covid positive patients even though I have not worked as a floor nurse in over 20 years. I have medicines, gave breathing treatments and assessed patients.
