Work Experience

Icu RN

The Medical Center of Macon

2018 to Present

- Assess patients' conditions by thoroughly going through their records and medical histories.
- Interview patients to determine complaints and take notes to add to their records.
- Check and record patients' vitals such as pulse, respiration, blood pressure, and temperature.
- Observe patients to determine changes (deterioration or betterment) in condition and ensure that they are reported and recorded immediately.
- Establish treatment plans for assessing patient conditions and ruling out aversion or allergies to medication.
- Perform diagnostic tests by firstly taking samples of blood and urine and then following up with the lab to ensure that results are promptly provided.
- Treat medical emergencies such as strokes and heart attacks and victims of burns and accidents.
- Educate patients and their families about conditions and medication.
- Measure health outcomes against patient care goals and provide/incorporate suggestions for improvements.
- Ascertain that a clean and sanitized environment is maintained for patients by adhering to infection control procedures.
- Document patient care services by making sure that all medications, conditions, responses, and observations are properly recorded.
