LICENSURE, CERTIFICATIONS AND ACHIEVEMENTS

- RN license since May 27, 2020
 - License number: 254032-30
- CPR/AED certified
- BLS certified
- 2x Daisy Nominee

WORK EXPERIENCE

MUSKEGON SURGERY CENTER

MUSKEGON, MI

Preoperative and PACU

November 2021- current

This surgery center specializes in outpatient surgeries that range from cataract and carpal tunnel surgeries to total joint and spine surgeries. As a nurse, the patients I see on a daily basis are overall healthy individuals. We see our patients from start to finish, prioritizing assessment and medication reconciliation, to proper medication dosing based on past medical history and allergies. While doing this it is very important to stay prompt and efficient in patient care to keep surgeries on time. I then care for the patient's after surgery in the PACU doing post anesthesia assessments, pain management and proper education for them to feel comfortable going home. This is a fast paced facility to allow for quick turnaround of surgeries for the day, while also ensuring safe, controlled patient care until discharge of the patient.

RILEY HOSPITAL FOR CHILDREN

INDIANAPOLIS, IN

Burn/Critical Care Unit

July 2021-October 2021

This unit is the primary pediatric burn and plastics unit for the state of Indiana. When the census is low for burn patients, we take trauma, neuro, and ICU patients. In a fast paced, high acuity environment, patient care is timely, organized and very specific to provide the best care for the patient and the best communication with collaborating teams, especially during critical events. My experience on this unit has greatly improved my critical thinking and assessment skills, which has translated into improving my nursing skills, the everyday care I provide for patients, as well as the education I can provide for their families.

IU HEALTH METHODIST HOSPITAL

INDIANAPOLIS, IN

Orthopedic Trauma Med-Surg Unit

July 2020- July 2021

The majority of the patients cared for on this unit come from PACU, PCU or ED due to a trauma or an elective orthopedic surgery. With a 1:5 or 1:6 nurse to patient ratio, I have learned how to appropriately prioritize, delegate, and time manage tasks all while keeping patient safety and care at the forefront of all of my nursing tasks. This unit has allowed me to expand my nursing judgment, critical thinking skills as well as communication with healthcare providers and coworkers caring for the patients on the unit.
