## Objective

I will be relocating to the Norfolk, VA area and am seeking a new opportunity in which I can use my varied nursing experience to continue providing patient-centered care to those in need.

## Experience

---

### Primary Nurse Case Manager, CVS Specialty/Coram Infusion Services, May 2021 - present

- Prepares and administered drugs to patients in the home. Drug classes include antibiotics, inotropes, parenteral nutrition, chemotherapy, intravenous immunoglobulins
- Obtains and interprets results of blood samples to ensure proper treatment for patients
- Obtains and maintains various types of intravenous access, including peripheral catheters, implanted ports, peripherally inserted central catheters, tunneled central catheters, and traditional central catheters
- Coordinates care with a team of pharmacists and the following physician to ensure adequate patient care
- Manages schedule to care for multiple patients with a variety of diagnoses and scheduling needs

---

### Registered Nurse, Special Care Unit and Pediatric Intensive Care Unit, Children's of Alabama, August 2019 - May 2021

- Prepared and administered a wide variety of drugs safely
- Provided age-appropriate, patient-centered care to patients of various ages, neonate to young adult
- Cared for patient populations attended to by various service lines including endocrinology, neurology, neurosurgery, pulmonology, neonatology, general pediatrics, and hematology and oncology
- Act as a member of the rapid response team
- Performed relief charge nurse duties as needed, including making staff assignments and patient placement

---

### Registered Nurse, Cardiopulmonary Critical Care Unit, University of Alabama Hospital, June 2018 - August 2019

- Collaborated with an interdisciplinary team to provide safe, effective, evidence-based patient care
- Prepared, administered, and titrated a wide variety of drugs safely
- Cared for patient populations including pre-operative and post-operative cardiothoracic surgery patients, and those requiring extracorporeal membrane oxygenation. Also cared for patients who were overflow from the medical intensive care unit.
