Experience

Registered Nurse, Cardiac Stepdown, Soin Medical Center, Beavercreek, OH

Mar. 2019 – Aug. 2019

- Created and maintained patient specific plan of care and performed nursing care in an organized and systemic manner.
- Educated patients and family about plan of care, medications and lifestyle changes during discharge if applicable.
- Adapted to a rapidly changing work environment and responds quickly to emergencies and initial lifesaving responses.
- Administered oral and IV medications, observed responses; and interpreted telemetry monitor strips and documents appropriately every shift.
- Oversaw and delegated tasks to other RNs and nurse aides when appropriate.
- Monitored patients' conditions, documented changes, and collaborated with physicians to ensure proper patient care and safety.

Registered Nurse, ICU, Sycamore Medical Center, Miamisburg, OH

Aug. 2019- Present

- Assists doctors in the delivery of medical procedures and provided basic life support in emergency situations.
- Assess patients' condition, notified physicians of clinical changes and prepared and implemented patient care plans.
- Educates and update patient family members on patient conditions in a compassionate and non-technical manner.
- Manages ventilated and sedated patients, arterial lines, central lines and other invasive lines as well as continuous ECG monitoring.
- Manages pharmacological drips including sedative and vasoactive drips.

Class Representative, UH, Sugar Land, TX

Feb. 2018 – Dec. 2018

- Serve as advocate for students to faculty and vice versa by relating concerns and other information between both parties.
- Volunteered for great causes such as the March of Dimes for Babies by raising funds for kids in need.
- Organized social events during breaks to create a fun atmosphere after each semester.

Clinical Nursing Experience

Capstone (ICU) Rotation, Methodist Sugar Land, Sugar Land, TX

Oct. – Dec. 2018

- Answered all call lights promptly and utilized critical thinking skills by formulating nursing diagnoses and goals specific to every patient.
- Performed comprehensive head-to-toe assessments, ensured patient safety, administered medication, utilized therapeutic communication with all patients.
