Resourceful, trustworthy, organized and efficiently works with the patient healthcare team. Desiring a position as a Registered Nurse.

Work Experience

Pediatric Home Health Nurse

Maxim Healthcare Group - Carlsbad, CA

July 2019 to Present

- Collected data from nurse colleagues about patient's diagnosis and plan of care, analyzed information, documented the patients plan of care for the day using nursing diagnosis and interventions.
- Managed patient's gastrostomy tube, including, but not limited to checking patients' g-tube site, cleaning and changing g-tube, administering medication, flushing g-tube, and administering feedings, and assessing patient for any possible complications.
- Cooperatively working with patients' parents and physicians on new diagnoses, new medications, and possible surgeries.
- Monitored and supervised patient during travel and prepared patient bag and travel equipment for travel. Assessing patient safety at all times.
- Educated family and patient on proper medication administration.
- Succeeded in correct trach care, and medication administration through trach.
- Worked diligently with ostomy bag, providing ostomy care and emptying.

Home Health Nurse

Guinto Home Care Incorporated - Palmdale, CA

January 2019 to May 2019

- Performed vital checks for each patient, including but not limited to: checking blood sugar, checking blood pressure, pulse checks, temperature, intake and output and reflexes.
- Managed and administered prescription medications of each patient, including but not limited to: blood pressure, antidepressant, antipsychotics, and diabetic medications.
- Assessed patient condition by managing wounds, checking for bed sores and muscle weakness.
- Integrated safe and sterilized fields for urinary catheter insertions for incontinent and immobile patients.
- Incorporated physicians and care givers in plan of care for each patient.

Clinical Assistant

Kapi'olani Medical Center for Women & Children - Honolulu, HI

October 2017 to December 2018

- Provided quality care to infants, parents and their families including daily monitoring, recording, setting up equipment, setting up rooms for admission, admitting, discharging, transferring and escorting over 100 NICU patients per day.

- Collaborated with nursing staff and physicians to maintain a calm and safe environment for patients and their families. Assisted nurses in care, holding and feeding stable patients, mixing milk, changing diapers, obtaining vital signs, assisting physicians with procedures such as circumcisions.
- Commended by RN's and supervisors for assisting with hygiene measures and safely demonstrating practice of infection control.
- Floated to pediatric floor to sit 1:1 patients, monitor, obtained frequent vital signs, implemented therapeutic communication, assisted with activities of daily living.
