Experience

RN | 12/2011 - Current

Marin Health Medical Center - Greenbrae, CA

- Managed all facets of critical care including PA catheters and arterials, vasoactive drug administration and titration, thrombolytic therapy, dysrhythmia interpretation and chest tube management.
- Assessed patients, documented observations and reviewed patient charts to determine care needs.
- Provided direct care in critical care units, including surgical, cardiac, and neurological units.
- Mentored new nurses on practices and procedures to drive patient outcome goals.
- Collaborated with doctors to plan post-treatment home care and prevent return hospitalization.
- Administered care to patients suffering from catastrophic traumatic injuries.
- Directed care for patients in ICU, including implementation of treatment plan, monitoring vitals and administering medications.
- Triage and treated high-volume caseload in busy emergency room setting.
- Rendered direct patient care by stabilizing patients and determining course of action based on triage.
- Determined patient injury and illness by performing triage on [Number] incoming patients daily.

RN, CRITICAL CARE | 10/2007 - 05/2011

Ochsner Medical Center - New Orleans, LA

- Directed care for patients in ICU, including implementation of treatment plan, monitoring vitals and administering medications.
- Updated physicians on patient test results and assisted in developing care plans.
- Performed blood and blood product transfusions and intravenous infusions to address patient symptoms or underlying causes.

- Collected lab specimens, ordering and interpreting diagnostic tests and lab results.
- Monitored and recorded patient condition, vital signs, recovery progress and medication side effects.
- Supervised nurse administration of oral, intramuscular and IV medications to patients as prescribed, monitoring responses for adverse reactions.
- Administered medications, tracked dosages and documented patient conditions.
- Treated patients suffering from chronic and acute medical concerns, including asthma, seizure disorders and pneumonia.
- Improved patient outcomes and quality of care by determining and suggesting changes to processes.
