# **Certified Nursing Assistant**

Baptist Health January 2012 to August 2014

#### Patient care

- Vitals and I/Os
- Assisting the nurses with patient care
- Glucometer checks
- EKG test runner

#### Personal Note:

I am an energetic, eager to learn, and a team player. I have great critical thinking skills and feel as if I am great at communication with everyone from doctors, other nurses, cans and family members. My strength is that I am willing to learn new techniques, new policies and new procedures. My weakness is that my fear of change sometimes hinders me from stepping forward in a sense. I am very thorough in my work. I also believe that nursing is a 24 hour job and that we are all a team working towards the greater good.

# Additional Information

#### Skills:

I am a Registered Nurse with 4.5 years of experience. I started out on a med surg unit where I became knowledgeable of IVs, Foley Catheters, NasoGastric Tubes, wounds and wound vacs, Blood draws, and much more. I was able to perfect my time management. I was also a Charge nurse over the Med Surg unit where I had to supervise over 3-5 other nurses and 2-3 CNAs while also taking care of my own patient load. I then left Medsurg to try something new. I entered into Long Term Care Rehabilitation and skilled nursing. I was then charge nurse over the rehab unit that worked hand and hand with Physical therapy, Occupational therapy and Speech Therapy. I was promoted to manager of Restorative therapy which is therapy for patients/resident that just need to maintain ADLs and active range of motion.
