- Provide the initial all system nursing assessment prior to the provision care.
- Initiates the plan of care and necessary revisions including obtaining written physician orders for changes.
- Administer case management & follow-up skilled nursing visits in the patient's home.
- Perform home visits such as wound care, IV infusion therapy, blood draw, Foley catheter care, and more.
- Assess and chart observations of the patient's condition at each visit.
- Provide service and/or treatments requiring substantial and specialized nursing skills.
- Performs assessment/data collection in an on-going systematic manner, focusing on physiologic, psychosocial, cultural, spiritual and cognitive status; also, nutrition, pain, patient/family education, family involvement and patient advocacy.
- Coordinate appropriate care, encompassing various healthcare personnel (such as Physical Therapists, Occupational Therapists, Home Health Aides and external providers).
- Identifies discharge planning needs as part of the care plan development and implements prior to discharge of the patient.

Contract ICU RN

PAM Health Specialty Hospital of Las Vegas - Las Vegas, NV

April 2021 to Present

Working as a contract nurse provides quality patient care to critically ill patients, through the nursing process of Assessment, Planning, Intervention, and Evaluation. Serves as a patient advocate at all times.

Supervises the nursing care provided to each patient by other caregivers. Develops the plan for nursing care as a result of coordination with the patient, family and staff of other disciplines as necessary. Applies critical thinking in order to promote positive clinical outcomes. Ensures patient education. Participates in discharge planning.

- Maintains the standard of nursing care and implements the policies and procedures of the hospital and the nursing department.
- Makes referral to other disciplines based on the assessment, such as rehabilitation and nutritional services.

- Develops a nursing care plan for assigned patient on admission and updates the plan of care as needed. Ensures the plan is discussed and develops as a result of the coordination of patient and family and the interdisciplinary team.
- Perform patient admission assessment and reassessments, develop patient care plans, and other pertinent information completely in the patient's electronic medical record.
- Administers medications with verbalized knowledge of the action, side effects, correct dosages and route according to ICU policies and procedures
- Experienced in caring for patients with cardiac rhythms such as V-tach, V-fib, PVC's, asystole, 1st, 2nd and 3rd degree heart block, atrial fibrillation, and atrial flutter.
- Directs, supervises, and evaluates nursing care provided to patients.
- Coordinates nursing care of patients when scheduled for therapy or procedures by other departments.
- Assists with or institutes emergency measures for sudden adverse developments in patients such as cardiac arrest, respiratory arrest, or sepsis.
