Work Experience

Walker Methodist - West Ridge, AR
September 2019 to November 2021

I worked on the dementia floor as the overnight nursing assistant. I assisted residents with toileting, washing, changing, and dressing in the morning for the day. I did light housekeeping including but not limited to resident laundry, preparing the dining area for the morning shift, dusting, sweeping, mopping and vacuuming. I administered medications for residents. I did electronic charting for all residents during my shift. Maintained hipaa compliance for each resident.

Redeemer Health and Rehab
May 2017 to September 2019

I worked as a long term care assistant under the direction of the registered nurse. I was responsible for maintaining resident care. I assisted residents with activities of daily living such as bathing, grooming, dressing, toileting, ambulation and repositioning. I answered resident call lights and gave assistance to resident needs. I directly reported all necessary materials to nurse and charted resident progress at the end of each shift.

Augustana Care Center
June 2012 to August 2017

I worked in many different nursing assistant roles during my time at Augustana. I was a home health aide in the assisted living apartments. As the home health aide.

I answered client pendants, assisted clients with bathing and dressing, made small meals for residents, assisted with medication administration, light housekeeping, and any other needs clients may have had. I was an on call assistant for a while so I floated around and assisted in many different buildings. My last role was an overnight assistant where I assisted residents with activities of daily living.
