Work Experience

Emergency Department Nurse

UMASS Memorial - Worcester, MA

July 2017 to October 2017

- Work emergency department in the hospital, taken care of level 1 and 2 and psych patients.
- Able to give competent care to patients with severe sepsis, to increase patient survival rate.
- Able to identify Stoke symptoms immediately on a patient.
- Provide complete nursing care to patient; administers medications orally, IV piggyback, IM, and Sub-Q.

Emergency Department Nurse

United Regional Healthcare - Wichita Falls, TX

February 2017 to June 2017

- Work emergency department in the hospital, taken care of level 1 and 2 to include psych patients at a 60 room ED.
- Provide complete nursing care to patient; administers medications orally, IV piggyback, IM, and Sub-Q.

Emergency Department Nurse

Comanche County Memorial Hospital - Lawton, OK

- Work emergency department in the hospital, taken care of level 3 patients and stabilized level 1 and 2 patients until transferred. Worked with psych patients of all ages. 30 room ED
- Provide complete nursing care to patient; administers medications orally, IV piggyback, IM, and Sub-Q.

Psychology Technician

Department of the Army - Baumholder, DE

September 2011 to July 2012

Germany

- Provided a variety of technical, administrative, nursing and clerical duties in support of psychology services and the TBI program.
 - Identifies problems; determines accuracy and relevance of information; uses sound judgment to generate and evaluate alternatives, and to make recommendations.
 - Worked with a network system of computers to include a server
-
- I am able to administer, score and evaluate a variety of psychological and neuropsychological tests and techniques (e.g., predominantly Automated Neuropsychological Assessment Metrics (ANAM4) and the Repeatable Battery for the Assessment of Neuropsychological Status (RBANS) to patients under the direct supervision of a professional staff member. I am able to discuss results of testing with

neuropsychologist in order to interpret data and provide treatment recommendation. You will conduct patient interviews to include obtaining specific data related to cognitive sequel currently experienced by patient; psychosocial histories; family, academic, developmental, medical, occupational, social, psychiatric and neuropsychological details for the purpose of diagnosing and/or prescribing a treatment plan. I am trained to complete a thorough mental status evaluation to determine if behaviors and test taking attitudes will affect validity and reliability of assessment inventories utilized. I am able to combine and compare test scores and interview responses with established norms and present factual data to be interpreted by professional staff members.

- I am able to provide a record of test scores by using appropriate norm group comparisons when necessary and written observations of significant testing behaviors noted during the administration of tests. I can control the testing environment and am familiar with and carefully follow the prescribed testing procedures to insure standardized conditions. I can secure the test results and patient records according to JCAHO and APA guidelines and observe and note significant behavior modes of response in the test or interview situation, and assess whether any circumstances in the situation will invalidate or significantly affect the data obtained. Results are compared with established norms, and factual data is presented to be interpreted by the neuropsychologist. I am familiar with DD2796, DD 2900, ANAM, and DA 7349 PHA for possible positive TBI referrals. I can follow established office procedures for referring patients with positive TBI and can explain clinic appointment procedures and priority of treatment. I am able to schedule and coordinate appointments for soldiers with local neuropsychologist through CHCS and compile ANAM data and draft reports in Excel. I can create and establish testing logbook and draft ANAM PowerPoint presentation and provide ongoing education as needed.
