Work Experience

Clinical Resource Nurse

OSF Medical Center

December 2020 to Present

The OSF CRT (regional float pool) provides the highest level of expert registered nurses to care for patients throughout their inpatient stay within OSF Healthcare. (floated to 3 northern OSF hospitals) The RN is responsible for assessing, planning, implementing, and evaluating nursing care provided to patients throughout the system. The RN must be highly knowledgeable and possess strong nursing skills necessary to provide excellent patient care that is appropriate to the ages of the patients served within their RN specialty. Registered Nurses at OSF Healthcare are licensed professionals empowered to participate in an interdisciplinary approach to meet the expectations of those we serve.

Registered Nurse

OSF SAINT ANTHONY MEDICAL CENTER - Rockford, IL

February 2015 to December 2020

Responsible for 3-4 patient assignments, the Stepdown ICU provides an opportunity to care for a diverse population of patients. The use of acquired and practiced critical thinking skills is a requirement for this unit. Thorough assessments and attention to detail are important when working with this population because of the vulnerable state our patients are in. Advocating for those I care for and reporting to all members of the care team, creates a smooth experience for our patients and those involved. Maintaining education, volunteer work, and precepting are other ways I describe my position outside of the floor.

Certified Nursing Assistant

Saint Anthony's Medical Center - Rockford, IL

February 2015 to February 2018

reporting to a RN and providing patient care on the Neurotrauma ICU was a great experience for me as a nursing student. I assisted with burn dressing changes and the care of the critical intubated patients. Vital signs, every 2 hour turns, oral care, foley care, skin assessments, bathing, recording Intake and output, are just some of the responsibilities.

Education
