Worked 1:1 with critical patients, prioritization, organization, utilization of Evidence base knowledge, educating, and used critical thinking skills was an important asset learned. I am able to take these skill sets and apply it to all fields and specialty in nursing. Communication, being on the same page and working as a team with interdisciplinary fields / colleagues was important. Assessed, treated, and provided quality care for my patients. Stayed on top of my game and was able to function independently and utilize resources as needed to optimize patient care.
