Associates Degree in Natural

Objective

To provide the best care to my patients in their most critical time of need.

Dear, Recruiting Representative,

I appreciate your time in reviewing my application. I have been working in emergency medical services since 2004. I began my work as an EMT in the city of Visalia, caring for residents of Tulare County. In 2012, I began working as an LVN at Tulare Regional Medical Center, where I worked in both long term care and the emergency department. I began my career as a Registered Nurse at Community Regional Medical Center's trauma medical surgical unit and Kaweah Health's emergency department, where I gained experience providing treatment in both a Level 1 and Level 3 trauma center. I discovered my passion for emergency medicine and patient care in general over the last 15 years. I strive to deliver the highest quality treatment possible to my patients and their families during their most vulnerable times. I'm hoping you'll enable me to join your team.

Experience

November, 2018 to current

Registered Nurse • Staff Nurse • Wellpath

Perform patient Assessment and treatment of patients in acute, inpatient and outpatient setting. Initiate COWS and CIWA monitoring and continuity of care.
