Work Experience

Registered Nurse

Vascular Center of Intervention - Fresno, CA
May 2019 to August 2020

I worked in a clinical setting at a busy vascular surgeon's office. The majority of the patients we see have the following diagnoses: ESRD, AAA, Carotid stenosis/occlusion, chronic venous insufficiency, peripheral arterial disease, and critical limb ischemia. We see a lot of post-op fistula creation/revisions, post-op CAPD insertions, post-op amputees, post-op carotid endarterectomies, post-op AAA repairs on designated days of the week. Two days out of the week, we perform the following procedures: peripheral angiograms, carotid angiograms, fistulograms, venograms, vein ablations, ultrasound guided sclerotherapy, epifix applications, and IVC filter placements/removals.

My duties are as follows:

- Scan referrals and based off dx, prepare the patient to be seen by the doctor accordingly
- Complete pre/intra/post op paperwork
- Administer conscious sedation
- Monitor pt pre/intra/post operatively
- Provide education pre and postoperatively
- Insert IVs (a lot of difficult insertions on ESRD patients)
- Perform wound care
- Remove staples/sutures/JP drains
- Call in prescriptions
- Retrieve proper guidewires, catheters, balloons, and other procedural equipment intraoperatively while making sure sizes are correct (ie. Making sure balloons will fit with the correct guidewire/sheath MD is using)
- Obtain vital signs
- Keep O.R. organized
