QUALIFICATIONS

I am a bright intelligent worker who is able to accept responsibility and accountability. I am a quick learner and I am able to adapt to different situations and different environments, I've picked up quite often and had the pleasure of working on many different floors in the hospital. I can work as an individual or in a group setting, because I am a team-oriented person. I am a solid worker who can multitask and do what is necessary to get the job done while putting patient safety first.

EXPERIENCE

JULY 2021- PRESENT

Med Surg Float Nurse • Carle Foundational Hospital

- Every three weeks make my own schedule
- Floats to various inpatient units including Medical-Surgical, Oncology, Orthopedic, Advanced Care, Cardiac, Neurology and Observation
- Receive assignments 10minutes before scheduled shift and report to the assigned floor in a timely manner
- Professional caregiver who assumes responsibility for a group of patients for a designated time frame and provides care to these patients via the utilization of the nursing process, nursing trends, technology, financial and human resources within the philosophy of the institution.
- Communicates with others directly and in private when necessary to resolve issues. Offers constructive feedback to assist in the professional development of peers, and confers with colleagues to expand knowledge base. Identifies own learning needs and takes initiative to begin appropriate solution.
- Fulfills all requirements of departmental competencies.

JUNE 2019-JULY 2021

Observation/Med Surg RN • Carle Foundational Hospital

- Receive and give bedside report, completes initial assessment of patient upon admission, while making sure my documentation is accurate and done in a timely manner, I help with the development of appropriate plans of care in accordance with unit standards based on patient and family needs, discharge patients when plan of care is resolved and treatment options are completed

Med Surg – Float Nurse

- Communicate with others directly and in private when necessary to resolve issues, such as medical doctors and residents, physician assistants, family, social work, case management, HCTs, outside nursing care facility, specialty unit coordination and staff from diagnostic test and procedure.
- I take responsibility for my patients and their care, while helping out on the floor as needed

FEBRUARY 2019 - MAY 2019

Registered Nurse • Cornerstone Rehabilitation and Health

- Total care of 30 patients per day, initiating treatment plans and administering medications
- As the RN I held a supervisory role and an LPN worked under me, I gave IV meds and did wound vac changes
- I also consulted with administration, MDs, family and support staff about patient care
