My objective is to bring my skills and experience as a n RN, with experience in the ER, Infusion therapy, education and consulting, to a company in need of a hard working, educated nurse.

Willing to relocate: Anywhere

Work Experience

Infusion RN Clinical Supervisor

SAH Infusion Center

October 2019 to Present

Duties included:

- Administering biologics to patients with autoimmune disorders, administering long term antibiotic therapy to individuals with post op infections, resistance bacterias, administering chemotherapy and hydration/ antiemetic medications for oncology patients, as ordered.
- Assess and educate patients on their therapy, before therapy begins, during their treatment, and follow up, in conjunction with their treatment team.
- Start PIV's, access PICC lines, ports, engrossing and hickman catheters for medication administration. Assess the line site and perform dressing and line care, as needed.
- Perform phlebotomy on patients with high HCT levels.
- As the Clinic Supervisor, I lead 7 staff members on a daily basis, 5 RN's, 1 CNA and 1 Patient Service Representative.. I assign patient assignments, (which I have one myself), field MD calls, chart reviews the day before, to ensure we have proper signatures, proper orders, and proper testing has been completed, to treat our patients, per MD orders and treatment plan parameters.
- As Clinic Supervisor, I deal with customer service issues, and work to resolve them. Responsibilities include workflow project improvements, maintaining quality and regulatory control of the clinic, meet or exceed productivity hour and budget goals.
