Certified nurse's assistant

2011-2012

Assist patients with daily activities including oral care, bathing, feeding, and positioning elimination, ambulation, vital signs and other duties as assigned by the charge nurse which are within my scope of practice. Observe and reports patient's status and needs to the primary nurse. I answer call lights in a timely manner. Update intake and output tallies and measure output via urinary catheter or collection. Demonstrate respect and regard to the dignity of all patients, families, visitors and fellow employees to ensure a professional, responsible, and courteous environment. Maintain professional composure and confidence during stressful situations. Maintain open communication using appropriate chain of command regarding work-related issues. Conduct all work-related activities with respect for the privacy, rights and dignity of patients and families. Make sure to work within my scope of practice.

Medication assistant

2012-2016

I was responsible for using my knowledge and expertise to ensure that all clinical processes and systems are followed appropriately and according to the guidelines laid down by facility. Provide direct resident care as appropriate with the resident's condition and age. Kept medical histories protected and interviewed patients to procure or verify information. Took vital signs; blood pressures, temperature, and weight before/after medication administration; especially with blood pressure medications. Made schedules of appointments and performed general front-desk tasks; recording, bookkeeping, writing. Help in collection of data such as biological, psychological, social, and cultural factors ensuring patients comfort and prepare them for examination. Administered medications per specified policies and procedures (all the 8 rights). Reinforce patient education as provided by the Registered Nurse/LV. Strictly adhere to healthcare facility policies and procedures. Creating and maintaining proper documentation.
