Work Experience

Registered Nurse

Willis-Knighton Health System - Bossier City, LA

Present

In my current role I admit patients to my unit who may require titrating drips, extensive stroke assessments and invasive monitoring. Typically, I am providing a higher level of care than the typical medical/surgical patient, but they will not require admission to the Intensive Care Unit. The lower nurse-to-patient ratio of 1:3 allows me to collaborate with the healthcare delivery teams, the patients, and their families for a coordinated plan of care. I work alongside support staff on this unit to maximize the patient's overall outcome. I have been cross-trained to Med-Sur, Telemetry, Stepdown, and ICU which I also work weekly.

Registered Nurse

University Health - Shreveport, LA

January 2018 to January 2019

Responsible and accountable for directing, planning and organizing the nursing activities on the unit for an assigned shift with focus on patient, physician and staff needs. deliver skilled patient care through the nursing process in accordance with established polices and procedures; for coordinating patient care through the nursing process in accordance with established polices and procedures; for coordinating care among patient/family, medicine, nursing, and ancillary and other team personnel; acts as patient advocate; and maintains current knowledge and standards of professional nursing practice.
