## Work Experience

---

### **LPN Charge Nurse**

Norton Staffing and Recruiting Group - Denver, CO  
August 2021 to January 2022

Charge Nurse for up to 30 patients. Administered meds and breathing treatments. Did wound care treatments per orders. Did total body assessments and reported changes to MD. Charted new orders in chart and reported to responsible parties.

### **LPN (Licensed Practical Nurse) wound nurse**

Encompass Health - Colorado Springs, CO  
May 2019 to September 2019

I was the wound nurse for the company. I treated all patients with wounds. I reported weekly to the other nurses and doctors about the patients wound progress. Updated care plans, and recommended dietary and supplemental additions to promote wound healing. Charted updates and treatments with each wound bandage change and recommended changing wound care treatments if no progress was noted for more than 2 weeks.

### **LVN Charge Nurse**

Union Printers Home - Colorado Springs, CO  
January 2019 to May 2019

Charge nurse for about 30-35 patients. Administered meds, breathing treatments and wound care. Reported to other nurses, doctors, and family of any changes in the residents condition. Charted on all necessary patients.

### **Wound Care Nurse**

Kindred Hospital Tarrant County - Fort Worth, TX  
August 2016 to December 2018

Lvn wound care nurse. Worked with wound care team rounding with 6 different wound care doctors on all wound care patients at the hospital. Charting wound changes and communicating with primary nurse and doctors, changing wound treatments if necessary and recommending dietary supplements as well as communicating with the patient or responsible party.

### **LVN Wound Care Nurse**

Ridgeview Rehabilitation & Skilled Nursing - Cleburne, TX  
June 2013 to July 2016

Lvn Wound Care Nurse Wound care nurse for the facility. I treated all patients with wounds and rounded with 3 primary care physicians and 2 wound care physicians on all patients. I communicated with the

primary care nurse, the patient and/or the responsible party updating on the wound status. I recommend wound care changes and dietary supplement changes to promote wound healing. I gave in-service's to staff to educate on wound healing and more importantly, wound prevention. Our facility went over 2 years free of in house pressure wounds due to total teamwork from all staff. I sat in on weekly SOC meetings with all department heads and the medical director giving updates on all patients with wounds. I would frequently have to work the floor as a charge nurse when other nurses called in. I would take care of g-tube patients, trach patients, patients with breathing treatments and pass meds for the patients as well.
