Passionate about collaborating within a professional team and utilizing my skillset to offer the highest level of patient centered care. Currently seeking a new graduate RN position that will expand my nursing education, skills and knowledge to reinforce the facility's operations, while providing a platform to practice exceptional leadership skills and care while advocating for patient safety, and hospital standards.

Authorized to work in the US for any employer

Work Experience

Registered Nurse (RN) Research Nurse IV Nurse ICU Nurse

The Shepherd Center - Atlanta, GA

July 2018 to Present

- Clinical Trials Services our clinical trials team manages the entire clinical trial cycle including: assessment, initiation, incorporating study protocol into clinical operations; subject recruitment and retention; data collection; monitoring; and study close-out. Close collaboration with corporate teams ensures that mutual goals are met. The Principal Investigator provides leadership to the clinical trials team, and is supported by the clinical trials team in every aspect of trial conduct.

The following are examples of services the clinical trials team provides to industry sponsors, contract research organizations (CROs) and Principal Investigators. Work as a resource: Site Selection, Study Initiation, Implementation of the Study and Study Closure.
