Telemetry

## CAREER OBJECTIVE

Most people would identify me as honest, hardworking, and responsible, but these are just few life skills I find necessary of being a human being today. I prefer to acknowledge myself as morally and culturally centered, as well as people oriented. I believe my career as a nurse is an achievement, yet an opportunity. An opportunity to serve, educate, coach many communities to a life of better health and longevity. I take immaculate pride in this position and the role I play in my community. I believe that with compassion and authenticity, I can have a lasting impact on those I have the honor of caring for.
