Additional Information

5. Computer knowledge: MAC and PC platforms including Word and Excel; and E-mar/E-tar hospital computer platforms

ACQUIRED SKILLS

* My abilities to elaborate upon the basic concepts of health and illness as presented in Nursing Fundamentals. Also, being able to apply theories of nursing in the care of patients through the lifespan, utilizing problem solving and critical thinking. In addition to providing an opportunity to study conditions affecting different body systems and apply evidence-based nursing interventions; and introducing concepts of leadership and management.

* My dedication to health promotion for individuals and families throughout the lifespan. I have cared for the developing family, which includes reproductive issues, pregnancy, labor and delivery, post-partum, the newborn, and the child. I've recognized the spectrum of healthy families we will discern patterns associated with adaptive and maladaptive behaviors applying mental health principles; with an emphasis on teaching and supporting healthy lifestyles choices for individuals of all ages. Nutrition, exercise, stress management, empowerment, and risk reduction practices are highlighted. Studying the family to cover dynamics, functions, discipline styles, and stages of development.

* My experience in applying nursing concepts and therapeutic interventions to patients across the lifespan. It also provides an introduction to concepts of teaching and learning. Extending care to include the family is emphasized.

* My confidence in applying nursing concepts and therapeutic nursing interventions to groups of patients across the lifespan. It also provides an introduction to leadership, management, and team building.
