Work Experience

Registered Nurse (RN)

Porterville Developmental Center - Porterville, CA
October 2021 to Present

As an RN at porterville developmental center I am responsible for care of clients that are inmates deemed mentally incapable of standing trial. Duties consist of physical assessments, vital signs, medication administration, monitoring behaviors and re directing when necessary. I also work closely with an interdisciplinary team to ensure clients are progressing toward rehabilitation.

Registered Nurse

Sierra valley dialysis center - Porterville, CA
March 2018 to Present

My position at Sierra valley dialysis center consists of charge nurse role. My responsibilities are direct patient care, physical assessments, monitoring vital signs, initiation and termination of dialysis treatment, insuring correct orders for each patient are implemented during dialysis treatments, Medication administration, delegation of tasks to dialysis technicians and nurses, and assume the charge role in emergency situations. As charge nurse I am also responsible for the dialysis unit as a whole, which includes patient scheduling, staff scheduling, care plans, progress notes, interdisciplinary team meetings, monitoring patients labs, vaccines, communication with doctors and changing orders frequently to ensure appropriate individualized patient care.

Registered Nurse (RN)

Kaweah Delta District Hospital - Visalia, CA
August 2017 to March 2018

my position at Kaweah Delta hospital was Registered nurse on a med surf/oncology unit. I was responsible for direct patient care including, patient assessments, vital signs, medication administration, communication with interdisciplinary care team and adjusting patient care as necessary. I was also responsible for delegation of tasks to other care team members. While working on this unit I was able to gain experience in many areas such as starting and discounting Iv's, and IV medication administration, including pain management comfort care measures for end of life, Foley catheters, blood transfusions, dressing changes, administration of chemotherapy medications, blood sugar checks, insertion of NG tubes, recognizing and reporting changes in vital signs and providing emotional support to patient and families.
