I am a committed professional registered nurse with expertise in a multitude of critical care environments: neurological and neuro-surgical with extensive knowledge of stroke care, ventriculostomy drains and intracranial pressure monitoring, cardiac and cardiovascular surgery with post-operative recovery and care of patients with coronary by-pass, heart valve repair and valve replacement surgeries. I am certified in intra- aortic balloon pump therapy, as well as experience with Impella, and ECMO therapy for critically ill cardiovascular patient clientele as well as the invasive lines, pacemakers and crucial intravenous medications and titrations of these drips requires for patient recovery. I have also provided care for an extensive clientele of multiple trauma patients' requiring massive blood transfusions, as well as extensive experience in care of patients with septic shock, multi-system organ failure requiring continual dialysis therapy amongst the multitude of critically ill patients in intensive care settings

My Health One Continental Division transfer center job requires a thorough knowledge of EMTALA laws as well as highly trained critical thinking to anticipate providers and patient care needs for transfer to facilities with higher levels of care ability, providing consultations from expert stroke providers to facilities that do not have these physicians available as well as initiation of critical air transportation at times.

#### EDUCATION:
