Patient service-focused and top-performing Registered Nurse with broad based experience and exceptional knowledge of delivering excellent pre and post-anesthetic patient care. Demonstrated ability to monitor and document patient's condition accurately. Deep insight into operating equipment such as cardiac monitors and pulse oximeters and quickly diagnosing problems and responding promptly. Demonstrated expertise in monitoring patients' post-surgical vital signs to ensure their stability and wellbeing. Unmatched ability to assess patients' conditions in post-surgical environments while implementing post-surgical treatment plans to ensure increased chances of patient recovery and comfort.

## Work Experience

---

### **Registered Nurse**

Navicent Atrium Health

February 2020 to April 2022

- # Floated to all the units in the Level 1 Trauma facility except Emergency Room and ICU's.
- # Provided patients with one on one nursing care, to ensure their physical and emotional wellbeing.
- # Monitored patients' vitals, and ensure that they are recorded according to specified protocols.
- # Handled emergency situations by providing CPR, and following other emergency handling procedures.
- # Monitored and adjusted specialized equipment used on patients, and interpret and record readings.
- # Communicated with families to provide them with accurate information on patients' conditions.

### **Registered Nurse**

Providence Health

May 2014 to December 2019

- # Responsible for assessing patients, administering medications, dressing changes, vital signs, documentation and reporting abnormal to physicians and most importantly patient education.
- # Implemented a comprehensive patient education program resulting in increased awareness of surgical procedures and post-surgery care.
- # Coordinated efforts with healthcare team members to create and develop individualized care plans for specific patients undergoing surgery.
- # Conducted pre and postoperative education by providing information to patients and families on what to expect.
- # Provide emotional support to patients and their families during distressing times.

### **Registered Nurse**

Lexington Medical Center

April 2016 to August 2019

- # Assessed patients' conditions by thoroughly going through their records and medical histories.
- # Checked and record patients' vitals such as pulse, respiration, blood pressure, and temperature.

- # Observed patients in order to determine any changes in their condition and ensure that they are reported and recorded immediately.
- # Established treatment plans for assessing patient conditions and ruling out aversion or allergies to medication.
- # Discharge patient or admit based on physician orders.

### **Clinical Research Nurse**

Neem Research Group

October 2011 to April 2016
