Work Experience

RN Staff Nurse

San Joaquin General Hospital - Stockton, CA

February 2021 to Present

- Check all the emergency drugs and equipment to make sure that all the machinery equipments are in working conditions. ♦ Measure vital signs of the patients and laboratory data to determine emergency interventions needs.
- Administer medications (oral/intravenous/intramuscular), blood and blood products and monitor patients for adverse effects of blood transfusion ♦ Set up equipment such as cardiac monitors, and operate infusion and syringe pumps ♦ Proactively learned new procedure and treatment protocols from more established nurses. ♦ Provide care to patients with mechanical ventilators ♦ Draw blood samples for Arterial Blood Gas analysis ♦ Assist doctors in performing diagnostic or treatment procedure such as: endoscopy, endotracheal intubation, central venous pressure insertion.

Highlights

- Direct patient care
- Patient care management
- Assessments and care plans
- Detailed and organized
- Good managerial skills

Accomplishments_____

- Known as one man army
- Believe in finishing work in time and do it at my best ♦ Like to maintain good interpersonal relationship with patients and teammates ♦ Believe in encouraging patients for health care maintenance and providing health education as preventing services
