Work History

2022-01
- present

Registered Nurse, Progressive Care Unit, Telemetry

Roper St. Francis Hospital, Charleston, SC

- Provided direct patient care, stabilized patients, and determined the next course of action.
- Management of cardiac drips, IV antibiotics, and fluid/ electrolyte balances.
- Managed care from admission to discharge.
- Educated patients, family members, and caregivers on the diagnoses and prognosis, treatment options, disease process, and lifestyle changes.
- Responded to code blue alerts within the facility to initiate life- saving protocols.
- Telemetry monitoring on every patient for electrolyte and cardiac management.
- IV, catheter, and NG tube placements.
- Maintained quality care and comfort for patients with heart failure, pulmonary hypertension, and various other diseases.
- Evaluated healthcare needs, goals for treatment and available resources of each patient and connected to optimal providers and care.
- Collected blood, tissue, and other laboratory specimens.
- Implemented medications and IV administration, catheter insertion, and airway management.
- Observed, recorded, and communicated patient conditions utilizing Cerner and Telemediq.
- Charted nurse's notes to reflect care provided to resident and resident's responses to the care and interventions.
- Collaborated with various healthcare providers to quickly assess patients and deliver appropriate treatment while managing rapid changing conditions.
- Provided exceptional care to high acuity patients needing complex care such as extensive wound management, NG tube and G tube management, and rehabilitation.
- Monitored cardiac and other critical vital signs to detect changes and enable intervention of life- threatening and emergency situations.
- Administered prescribed medications, changed dressings, cleaned wounds, and monitored vital signs to provide high standards of patient care.
