Colorado Springs, CO 80907 United States

10/2018 - Present

Hours per week: 36

Critical Care Registered Nurse

Duties, Accomplishments and Related Skills:

As a Critical Care Registered Nurse, I am responsible for administering care to seriously ill and injured patients. I triage and monitor patients to recognize and prevent complications that might arise and correct them. As an intensive care nurse, I work both independently and in conjunction with health care providers to identify and diagnose patients. I treat patients by administering oxygen, intravenous fluids, medications, injections, and blood transfusions. I am experienced in titrating critical medications such as vasopressors, sedation and cardiac medications. I am trained in observation and care for patients who have suffered from heart attacks, strokes, gunshot wounds, traumatic brain injuries, bone fractures, motor vehicle accidents, drug overdoses and other emergent injuries. I assess patients for physical as well as psychosocial and cultural needs. I have experience in administering medications through various routes to include rectal, intravascularly, intramuscularly, subcutaneously and orally. I am apt at insertion of intravenous catheters, nasal gastric, oral gastric and rectal tubes. I have extensive experience with central line, and arterial line care, both radial and femoral. I am proficient in documentation and familiar with Cerner, Meditech, Epic and Alta electronic charting programs. I use Theragaurd, Alaris IV pumps, kangaroo pumps, rapid infusion pumps, BIS monitoring, CVP monitoring, and defibrillators. I maintain my nursing competencies and certifications according to hospital policy and nursing standards. I am Advanced Cardiac Life Support (ACLS) and Basic Life Support (BLS) trained and qualified and I have a current compact-state nursing license I have been able to adapt to the changing policies and procedures related to Covid-19. I am trained and experienced to recognize emergent situations and to act accordingly. I think clearly and calmly in stressful situations, relying on my experience, training and the support of my team.

I am proficient in the clinical orientation, precepting and educating of new nurses as well as my peers. I coordinate care management with multi-disciplinary members to provide quality care to my patients. This team includes case management, spiritual care, nutrition, pharmacology, physical therapy, occupational therapy, physicians and discharge planning. My nursing care is based on clinical analysis and clinical based care. I am continually researching the best ways to
