Background in sales, customer service, and working as part of a team to assist patients. Experienced with handling challenging situations in order to make a difference in people's lives. I enjoy staying current on medical trends and look forward to providing the best care for my future patients. For my own experience, I volunteered at a pediatric clinic to expose myself in any type of way on how to interact with patients. For my clinical rotations, I spent majority of time in the step down unit, medical surgical unit, and intensive care unit as I dedicate my future specialty in. My nursing career has brought me enough experience to be floated to different types of units indeed of help. My goal is to truly continue to grow overall as a registered nurse and dedicate my skills to help others.
