Work Experience

Pre-op/PACU RN

MedBridge Development - Santa Barbara, CA

February 2021

- Administered medications to manage progression off anesthesia medications, deal with side effects, and promote recovery
- Employed nursing best practices and clinical judgment to continuously evaluate patients' progress and employed interventions to achieve desired outcomes
- Evaluated patients recovering from surgeries and coming out of anesthesia
- Monitored patient pain levels and administered medication to diminish patient discomfort
- Delivered information regarding care and medications to patients and caregivers in comprehensible terminology
- Assessed patient conditions, monitored behaviors, and updated supervising physicians with observations and concerns
- Evaluated patient care needs, prioritized treatment, and maintained patient flow
- Accurately documented all elements of nursing assessment, treatments, medications, discharge instructions, and follow-up care
- Utilized strong assessment skills to determine necessary patient care
- Interviewed patients to obtain medication information
- Maintained patient charts and confidential files
