

**BACKGROUND**

My professional career includes delivery of patient centered care in the settings of various inpatient hospital units; which you will find listed in detail below. As a travel nurse I am able to adapt to multiple facility protocols within an expedited timeframe. I have developed effective time management, prioritization and communication skills.

**EDUCATION**

- Western's Governor University, BSN, December 2023
- Community College of Baltimore County, ADN, October 2017

**PROFESSIONAL EXPERIENCE**

*St. Agnes Hospital, S2500 Oncology/ Adex Medical Staffing, Baltimore, Maryland*

*October 2021-Present*

- Performed as a clinical RN on various medical-surgical inpatient units including oncology, telemetry, and emergency room holding.
- Assumed care of and monitored the respiratory status of patients assigned capnography.

*Memorial Hermann-Katy, Crisis Contract Float Pool, Krucial Staffing, Houston, Texas*

*August 2021-October 2021*

- Performed as a clinical RN on various medical-surgical inpatient units including COVID specific, step-down, postpartum, medical transitional, observation, and emergency room holding
- Assisted the respiratory therapy department with basic maintenance of patients receiving oxygen therapy, nebulizer treatments, and airway stabilization care.

*Sinai Hospital, 3 Center Medical Transitional Unit/ Adex Medical Staffing, Baltimore, Maryland March 2021-*

*August 2021*

- Direct supervision of 1-3 LPN/RN on a 10-bed medical transitional inpatient unit as charge nurse
- Communication with bed control and management in reference to admissions, discharges, and staffing events
- Assisting with codes and rapid responses
- Acted as a part of an interdisciplinary team to either downgrade or advance the level of care of patients based on patient condition and bed availability
- Acted as unit resource for the unit and assuming care of patients with various diagnoses including COVID-19

*Johns Hopkins Bayview Medical Center, Neuroscience Unit, Baltimore, Maryland, February 2018-March 2021*

- Performed as a clinical RN in the care of IMC and floor status patients with neurological alteration
- Assumed care of medical-surgical patients with various diagnoses including COVID-19 due to overflow from other units within the hospital.
- Administered IVIg infusions, as well as other titratable specialized infusions.

**ADDITIONAL SKILLS**

- Electronic Health Records (Meditech, Cerner, & Epic)
- BLS, valid through May 2024
- ACLS, valid through May 2024
