Patient and time management

Delegation

ER Registered Nurse

Riverside Emergency Department - Kankakee, IL

February 2019 to Present

- Analyzes the assessment data to determine the patient's nursing diagnoses or patient problems.
- Coordinates care delivery through the utilization of department, organization and community models and resources; critical thinking; interdisciplinary teamwork; patient advocacy; and the unique nurse-patient connection, and identifies and uses available resources to define and implement the plan of care.
- Detects and collects comprehensive data and identifies patterns pertinent to the patient's health and unique situation.
- Develops a plan that prescribes strategies and alternatives to attain expected outcomes, based on the patient's individualized situation and anticipated needs.
- Effects change through engagement, involvement, and participation of peers and colleagues, leading others where they need to be rather than where they want to go (American Nurses Credentialing Center [ANCC]).
- Employs strategies, including the art of translation, to promote healthy behaviors for patients and families.
- Enhances the quality and effectiveness of nursing practice through communication, documentation, initiation of change, creativity, innovation, participation in quality improvement (QI), evidence based practice (EBP), and research processes.
- Evaluates one's own nursing practice in relation to the Illinois Nurse Practice Act and professional practice standards and guidelines.
- Evaluates progress toward effective attainment of patient, family and community goals.
- Implements the identified plan based on the nursing process, our nursing mission and philosophy, and our organization's mission.

- Maintains competency in identifying life threatening clinical conditions and appropriate clinical treatment
- Mentors others in all aspects of nursing practice.
- Satisfactorily complete all required continuing education hours regarding the care of acute stroke patients.
- Clinical skills to be performed but not limited to: suture, sterile pack set-ups, wound irrigations, IV initiation with/without blood sampling, insertion and maintenance of indwelling catheters, NG insertions, chest tube maintenance, assisting with procedures such as lumbar puncture, thoracentesis, intubation, splinting and immobilization of extremities, etc.
