Job seeker

The job of a nurse consists on providing hygiene and comfort care to patients, under medical prescription, and ensuring continuity of care. The Nurse ensures the physical and moral well-being of the person in care, as well as the maintenance of his state of health. He/She must analyze the needs of the person in care, in order to establish a diagnosis and adapt his care. In addition, the Nurse manages the care file and the administrative part (transmissions, care planning, reports drawn up by the doctor, etc).
