Labor and Delivery Unit

Healthcare Experience

UCLA Ronald Reagan Hospital June 2019 – June 2020
Medical Scribe

- Facilitating patients alongside Dr. Ronald Cotliar in the Pediatric Dermatology Department
- Thoroughly eliciting and documenting patient history
- Calling in prescriptions and following up with pharmacies
- Delivering relaying instructions for the proper administration of medications to patients based on the physician's order
- Proactively pursuing opportunities to learn about the particular medical context
- Gaging patient needs and concerns through direct and detailed documentation and communication

United Family Medical Center June 2018 – 2020
Medical Assistant

- Drawing blood and collecting lab specimens
- Scheduling patients and effectively organizing patient documents and billing forms
- Managing, organizing, and maintaining documents in paper and electronic filing systems

Research Experience

USC Keck Medical School of Medicine

June 2018 – September 2019

Research Assistant

- Collected data ranging from a variety of drug users
- Established and oversaw mixed method study reflecting a community-based project, particularly addressing individuals who initiated drug injections in their thirties
- Evaluated methods driven to reduce multiple health risks plaguing minorities in particular
- Placed calls and maintained communication to remind patients of visit times

Volunteer Experience

Sinai Nursing School

- Conversing with patients and formulating authentic relationships
- Thoroughly gaging patient needs, obtaining history and taking vitals
- Facilitating patients as they navigate daily routines and activities
- Communicating with patient families to keep them informed

Global Medical Training

- Served underprivileged communities with adequate medical care in Lima, Peru
- Established remote clinics in rural areas
- Obtained vitals, patient history, and addressed unique patient profiles
- Closely interacted with translators to effectively interpret and relay medical information to patients
- Gained invaluable insights about marginalized populations and the urgency for adequate healthcare resources and medical attention

Friendship Circle

- Allotted weekly time to visit children with special needs
- Spoke with family members of children in order to offer emotional support
- Organized community outreach events with other volunteers
- Honed leadership skills by managing fellow volunteers and overseeing success of projects and events
- Actively pursued opportunities for improving outcomes in populations of young children with limited resources
