

# Olasumbo Sobimpe, Registered Nurse

Dallas, TX | 214-909-4137 | olasnms@yahoo.com |

Patient-focused with a continuous display of professionalism in patient care. Passionate and collaborative team player, effective communication skills, building relationships with patients, coordinating care plans, resolving problems with innovative solutions, and efficient in the use of Epic for documentation. Treating every individual as a unique being and caring for them like I would love to be treated with compassion, empathy, and love while imparting knowledge acquired through practical means and embracing culturally competent care.

## Professional Experience

---

**Dallas Regional Medical Center | Mesquite, Texas**

**Registered Nurse, Medical Surgical Unit, 2022**

- Providing safe patient care through the nursing process's assessment, planning, execution, and evaluation phases.
- Within the area of practice, provides direct patient care.
- Providing immediate and guiding patient/family teaching and activities of other nursing employees in the unit.
- Responsible for the care offered to assigned patients.
- Informs the doctor about changes in the patient's clinical status and critical lab results as soon as possible—the ability to react rapidly and accurately to changes in the patient's condition and treatment response.

**Graduate Nurse / Externship 2021- 2022**

- Responding to emergencies by remaining calm under pressure, reducing wait times by prioritizing patient care.
- Observed the care of patients by completing rotations in the emergency room, medical-surgical, telemetry, labor and delivery, ICU, progressive care, and the Cath lab, expanding understanding of care strategies.
- Tracking routine heart rate, blood pressure, and pulse oximetry measurements.
- Collaborating with healthcare hospitalists and reporting changes and deteriorating conditions.
- Collect specimens for testing by adhering to standard procedures, leading to more accurate results.
- Advising patients on post-hospital care, including prescribed medicine, home care protocols, disease prevention, and lifestyle changes.

**Modern Senior Living | Dallas, Texas**

**Clinical Student (Temporary) |**

- We have built relationships with adult patients using impeccable interpersonal communication skills, contributing to patient satisfaction rates.
- Enhance knowledge by observing various standard procedures and treatments, improving

personal ability to meet patient needs.

- Review patient records using careful attention to detail, achieving accuracy rate.
- Participate in patient care planning by collaborating with a team member and consistently advocating for patients.

### **Legent Orthopedic Hospital | Carrollton, Texas**

#### **Clinical Student (Temporary) | 2020- 2021**

- Prepared patients for surgery each day by explaining procedure information and checking vital signs, exceeding deadline expectations by delivering patients to their procedure area.
- Care for incisions and wounds using proper sterilization and bandaging practices, reducing infection rates by performing hand hygiene, wearing gloves, and using aseptic technique.
- Recorded patient information and data using Epic, always maintaining patient confidentiality.

### **Vibra Specialty Hospital | Dallas, Texas**

#### **Clinical Student (Temporary) | 2020- 2021**

- Assisted a patient following COVID-19 by supporting respiratory difficulties, decreasing oxygen dependency.
- Document progress using excellent written communication skills, verifying that leaders were kept informed.
- Administered medication using exceptional organizational skills, successfully complying with all schedules and instructions.

### **Grace Homehealth | Dallas, Texas**

#### **Certified Nursing Aide | April 2020 - December 2020**

- Coordinated care for patients per day by assisting with activities of daily living, reaching a maximum patient satisfaction rate.
- Check and record vital signs using keen attention to detail, leading to more accurate results.
- Confirm patient progress by regularly measuring input and output, subsequently communicating necessary observations to physicians.
- Monitored changes and responses to medications by collecting samples, recording vital signs, and asking questions, ensuring appropriate adjustments were made.
- Managed nutritional needs of patients by preparing food trays, supporting feeding, and documenting intake, adhering to strict dietary guidelines and recommendations.
- Engage with patients by assisting with personal hygiene, bathing, dressing, and undressing, decreasing falls by promoting safety measures.
