2022

ABOUT ME

I'm a fun and energetic Registered Nurse. I love caring for my patients and making each person's day better. I enjoy working in a team environment, but I am also great at independent work. I work hard in everything I do and in my off time I love to travel the world and go back home to Wyoming to see family. I am still working as a travel RN, but I am always open to finding either a permanent work environment or even PRN or part-time to supplement in my nursing experiences and life!

Travel RN

Aureus Medical Solutions: Sep 2020-Present

Travel RN working in Step-down, PCU, MS/Tele Units

- Mercy General Hospital-Cardiac PCU Sep 2021-Sep 2022
- Oakland Highland Hospital-Step Down Unit Sep 2020-Aug 2021

Neuro RN

Banner University Medical Center- Phoenix, AZ Feb 2019-Aug 2020

I worked as an RN for a Neuro/Trauma Unit, I achieved becoming Charge RN after working there for 6 months

- I worked as Charge RN handling case management rounds, staffing rounds, and helping to manage all staff RN's with tasks. I worked closely with the management team and other PCU floor staff to keep a smooth transitional flow of patients incoming and outgoing from different units or in/out of the hospital.
- I participated in Advanced Neuro Assessments, Cardiac Drip Management, bedside patient care, bedside neurology procedures, organizing patient care throughout the day and time management

Infusion RN

Center for Neurology & Spine- Phoenix, AZ Nov 2018-Jan 2020

I worked independently at a satellite office as an infusion RN for MS, ALS and Lupus patients. I reported to the Doctor for any needs via phone, handled scheduling of patients, ordering medications and supplies, administering the IV infusions and keeping the satellite office operating for our patients needs.

- IV infusion administration, monitored for any side effects or reactions, maintained vital signs during the infusion and charted and reported everything to the overseeing Neurologist.
- I handled all the maintenance of the office and ordering of any supplies and medications needed to maintain the continuation of patient care and have a clean and inviting office for patients to receive their treatments.
