## Work Experience

---

### **RN Charge/ICU/ER/Telemetry**

Travel Nurse - New Mexico & Texas

March 2021 to Present

Provided patient care, working in multiple units including ER, trauma, medical surgical units, and ICU units. Performed wound care, administered medications and treatments, and provided patient care through assessment, planning, implementation, and evaluation. I provide high acuity level of care to a number of cardiac-medical patients at a 2:1 patient to nurse ratio (sometimes 3:1 when we are short staffed). The patient diagnoses varied from COVID-19, Mis, arrhythmias, acute heart, renal, and respiratory failure, cardiogenic shock, pneumonia, and sepsis. Most of the patients would also require mechanical ventilation, and invasive hemodynamic monitoring.

### **RN Post-Partum/NICU**

Medical Center Hospital - Odessa, TX

April 2019 to April 2021

As a Mother Baby nurse, I provide comprehensive care to mothers and their newborns after the delivery. We monitor the health of mothers and their babies and provide baby care and lactation support, education and guidance. I have enhanced knowledge of patient safety, postpartum care procedures and prenatal and postnatal care. I continue monitoring the condition of the mother-baby couplet and establish solid communications between the mother and her medical care staff.

As a NICU Nurse, I worked in a Level IV NICU and provided critical care to premature neonates, neonates who have experience complications during delivery, or ones who develop problems after birth. Most of the neonates were provided with mechanical ventilation by conventional or high-flow oxygen with vapotherm. The neonates diagnoses ranged from feeding issues, IVH, anemia, apnea, PPHN, pneumonia, RDS, conventional heart defects, PDA, jaundice and sepsis. I assisted in umbilical line placement, percutaneous line placement, and did peripheral line placement

### **RN ICU/ER**

Medical Center Hospital

October 2020 to March 2021

I provide high acuity level of care to a number of cardiac-medical patients at a 2:1 patient to nurse ratio (sometimes 3:1 when we are short staffed). The patient diagnoses varied from Mis, arrhythmias, acute heart, renal, and respiratory failure, cardiogenic shock, pneumonia, and sepsis. Most of the patients would also require mechanical ventilation, and invasive hemodynamic monitoring.

### **RN ICU**

Midland Memorial Hospital - Midland, TX

May 2017 to August 2018

October 2014-May 2015

I provide high acuity level of care to a number of cardiac-medical and trauma patients at a 2:1 patient to nurse ratio. The patient diagnoses varied from Mis, arrhythmias, acute heart, renal, respiratory failure, cardiogenic shock, pneumonia, sepsis, level II traumas, and hypothermias. Most of the patients would also require mechanical ventilation, invasive hemodynamic monitoring, and continuous renal replacement therapy.

### **RN Charge Nurse**

Weatherford Regional Medical Center - Weatherford, TX

June 2016 to March 2017

I provide high acuity level of care to a number of cardiac-medical and trauma patients at a 2:1 patient to nurse ratio. The patient diagnoses varied from Mis, arrhythmias, acute heart, renal, respiratory failure, cardiogenic shock, pneumonia, sepsis, level II traumas, and hypothermias. Most of the patients would also require mechanical ventilation, invasive hemodynamic monitoring, and continuous renal replacement therapy.

### **Director of Nursing/Administrator**

Daybreak Venture, LLC - Weatherford, TX

January 2016 to November 2016

As a director of nursing I am responsible for managing and planning the nursing activities of a department within a hospital or healthcare facility. This involves evaluating and setting the goals and standards of the department. I provide general leadership in all nursing matters for an organization. As a DON I help create short- and long-term plans to meet the goals of the nursing department. I help review and institute nursing policies and procedures and ensure that the department is meeting governmental regulations and compliance standards. I help prepare budgets and conduct financial planning. As a DON, I develop a staffing plan and maintain a system of records and reports. I collaborate with staff, management and external groups to coordinate patient care. I facilitate regular meetings with department managers and direct reports. I also evaluate nursing care, treatments and services to make sure the patient needs are being met.

### **MDS Coordinator**

Daybreak Venture, LLC - Odessa, TX

July 2015 to January 2016

The job requires nursing assessment skills and the ability to conceive and create care plans based on a comprehensive resident assessment that is accomplished through resident and family interviews, physical assessment, observation, and input from the care team. My role as a registered nurse is to follow federal regulations related to the RAI clearly define what components of assessment should be addressed for persons admitted to nursing homes and the ongoing clinical decision making that is within the scope of practice of RNs.

### **Care Services Manager**

Marcy Place - Big Spring, TX

April 2014 to October 2014

Responsibilities

As a Care Services Manager, I used my nursing knowledge to assess and evaluate resident prospects qualify for our facility and level of care. I also care for our current residents by managing medication per doctor orders, provide training to staff monthly, and monitor changes.

### **LVN Instructor**

Career Point College - Austin, TX

January 2014 to April 2014

I taught LVN students human anatomy and physiology. I also taught medical terminology to my students. We focused on prefixes and suffixes of medical terms used in everyday nursing world. I also taught simulation lab to students to make them feel how each individual feels and learn the skills to being a great nurse.

### **Registered Nurse**

Medical Center Hospital - Odessa, TX

July 2013 to January 2014

I provide high acuity level of care to a number of cardiac-medical patients at a 2:1 patient to nurse ratio (sometimes 3:1 when we are short staffed). The patient diagnoses varied from MIs, arrhythmias, acute heart, renal, and respiratory failure, cardiogenic shock, pneumonia, and sepsis. Most of the patients would also require mechanical ventilation, and invasive hemodynamic monitoring.

### **RN NICU**

ORMC - Odessa, TX

December 2012 to May 2013

I worked in a Level III NICU and provided critical care to premature neonates, neonates who have experience complications during delivery, or ones who develop problems after birth. Most of the neonates were provided with mechanical ventilation by conventional, oscillation, or jet. The neonates diagnoses ranged from feeding issues, hydrocephalus, IVH, anemia, apnea, PPHN, pneumonia, RDS, conventional heart defects, PDA, jaundice, NEC, ROP, and sepsis. I assisted in umbilical line placement, percutaneous line placement, and did peripheral line placement.
