CAREER SUMMARY

I have been licensed as a Registered Nurse for over fourteen years and certified as a Family Nurse Practitioner for over two years. During this time, I have worked in a variety of settings, including an acute care trauma center, skilled nursing/subacute facilities, hospice, and home health. As a result, I have extensive experience in caring for patients suffering from a variety of diseases and in various stages of illness. I've shared the knowledge I've gained by training and educating nurses I work with. My experience, knowledge, and dedication rubs off on my colleagues and results in excellent patient care. During my time as a Nurse Practitioner, specifically, my knowledge base has increased significantly. I've treated patients in the outpatient, SNF, long-term acute and acute care settings, for a variety of conditions within internal medicine, pulmonary medicine, infectious disease, critical care and palliative care. I am very organized, detailed oriented and analytical. I have excellent communication skills with my colleagues, multidisciplinary team members, physicians, patients and their families.
