OBJECTIVE

To obtain a position where I can continue to utilize my critical thinking skills and my passion for patient advocacy to improve patient care. I am open to exploring a variety of career settings that will help me grow as a medical professional.

EXPERIENCE

RN Trauma-Surgical ICU • UF Health Shands • October 2021- Current

As a level 1 trauma ICU nurse in an academic magnet hospital, I am responsible for managing the care of high acuity patients. Educating and compassionately communicating with patients and their families is necessary in my position. I work with interdisciplinary teams and physicians throughout the day. I am able to think critically throughout the day to make fast decisions to keep patients safe while maintaining a calm and positive attitude. I also have experience training student nurses who rotate through our unit on clinicals.

Transporter/ Clinical Imaging Assistant • Marshall Hospital Contractor (Blue Ribbon Personnel) • March 2019- Jan 2020

As a hospital transporter I was responsible for safely transferring patients from their rooms to all diagnostic imaging tests throughout the hospitals. My experience was greatly concentrated in the ED and the ICU where I worked with a nursing team and doctors to transport unstable patients for emergency imaging as well as responding to stroke alerts and rapid response alerts throughout the day.

EMT • medic Ambulance • May 2018- March 2020

As an EMT I worked on an ambulance responding to ALS and BLS emergency calls. I have experience assisting with stabilizing, packaging and transporting critical patients in a pre-hospital setting. I was responsible for assessing and treating children and adults at wide ranges standby events which gave me experience in trauma, respiratory and cardiac emergencies in large public events. This job also required me to be trained in management and response of mass casualty events.

Property Manager • Sunrise Ridge Sanctuary • Jan 2016- Jan 2018

As a property manager I marketed and managed high-end vacation rental property for a small private company. Job duties included customer service, hospitality, property maintenance housekeeping and event planning.

SENIOR PRODUCT SPECIALIST • APPLE INC • JAN 2008- AUGUST 2012

Customer service and technical troubleshooting in a call center environment. I was part of the engineering team project (Formula 1) during new product and software release dates to capture bugs quickly for software updates and product recalls. I was trained in iPhone, iPad, Airport Wireless and OSX troubleshooting as well as trained in PC troubleshooting for crossover devices
