WORK HISTORY

Registered Nurse

2021-02 - PRESENT

TEXAS HEALTH RESOURCES, ARLINGTON

- Provided direct patient care, stabilized patients, and determined the next course of action.
- Managed care from admission to discharge.
- Implemented medication and IV administration, catheter insertion, and airway management.
- Collected blood and other laboratory specimens and prepared them for lab testing.
- Monitored patient condition by interpreting and tracking EKG readings, identifying irregular telemetry readings and updating team members on changes in stability or acuity.
- Administered medications and treatment to patients and monitored responses while working with healthcare teams to adjust care plans.
- Evaluated healthcare needs, goals for treatment and available resources of each patient and connected to optimal providers and care.
- Trained new nurses in proper techniques, care standards, operational procedures and safety protocols.
- Updated patient charts with data such as medications to keep records current and support accurate treatments.
- Taught patients how to improve lifestyle choices, dramatically reducing chance of symptom reoccurrence.
- Provided exceptional care to high-acute patients needing complex care such as ventilator management, extensive wound care and rehabilitation.
- Conferred with physicians to discuss diagnoses and devise well-coordinated treatment approaches.
- Organized and managed care of patients undergoing various therapies and procedures.
- Collaborated with physicians to quickly assess patients and deliver appropriate treatment while managing rapidly changing conditions.
- Educated patients, families and caregivers on diagnosis and prognosis, treatment options, disease process and management and lifestyle options.
- Maintained quality care and comfort for patients with heart failure, pulmonary hypertension and other conditions.
- Reviewed post-operative orders and continuously monitored patients' post-operative vitals, set up PCA and fluids and oriented patients to unit.
- Monitored patient reactions to drugs and carefully documented findings.
