WORK EXPERIENCE

Vanderbilt Adult Hospital

February 28th-Present

CVICU Registered Nurse

- Provided direct patient care to stable and unstable patients.
- Administered PO, SubQ, IM, IV medications and monitored effects.
- Titrated, monitored, and administered multiple IV medication at a time to include vasopressors, inotropes, sedation, and pain medications
- Monitored and directly worked with central lines like art lines, PA catheters, PICC lines, and other central accesses.
- Intervened in changing patient conditions
- Collaborated with various specialties within the hospital to provide patient care
- Provided care to patients with extra support devices like ventilators, balloon pumps, Impellas, and CRRT.
- Provided care to fresh post op patients after heart transplants, lung transplant, liver transplants, kidney transplants, coronary artery bypass, valve replacements, and cath lab procedures.
- Recorded data and assessments using Estar Electronic Record.

Murfreesboro Medical Clinic

October 2017-February 2022

Patient Care Technician

- Escorted patients back for their appointment. Ensured room and equipment was ready for each checkup/procedure expected to be conducted during each specific visit.
- Performed Electronic charting, recorded medications administered, verified and reviewed each patient's health history through TouchWorks.
- Gave intramuscular and subcutaneous injections under supervision.
- Managed the care of all of the patient's needs and wants during their appointment.
- Assisted in managing and maintaining each day's schedule for four physicians while providing services to 25 to 35 patients.
- Anticipated the doctors' needs for each visit and coordinated all the necessary requirements to maintain the patient flow allowing appointments to remain on track.
- Stocked all rooms with PPE gear and equipment. Cleaned, sanitized and inspected instruments in accordance with health care standards.
